

The following pictures were created and generously contributed by Deborah Koff-Chapin during a talk by David Spangler called *Subtle Activism*. This is the fifth in a series of five talks given by David at the Whidbey Institute near Seattle Washington in late 2009.

Deborah created these drawings spontaneously during the talk in response to the energy and ideas invoked. She uses a method called *Touch Drawing* which she invented. For more information about this method go to [www.touchdrawing.com](http://www.touchdrawing.com)
